# BUSINESS SERVICE MANAGEMENT

## Business Service Management

Set of methods, processes and tools for a complete IT management view from the business perspective

### ITIL "Out of the Box"

Set of applications aligned with ITIL best practices to support IT processes.

### Lean IT

Minimize misuse of resources by eliminating activities that do not provide clear value to the final result.

### Focused on Service Lifecycle

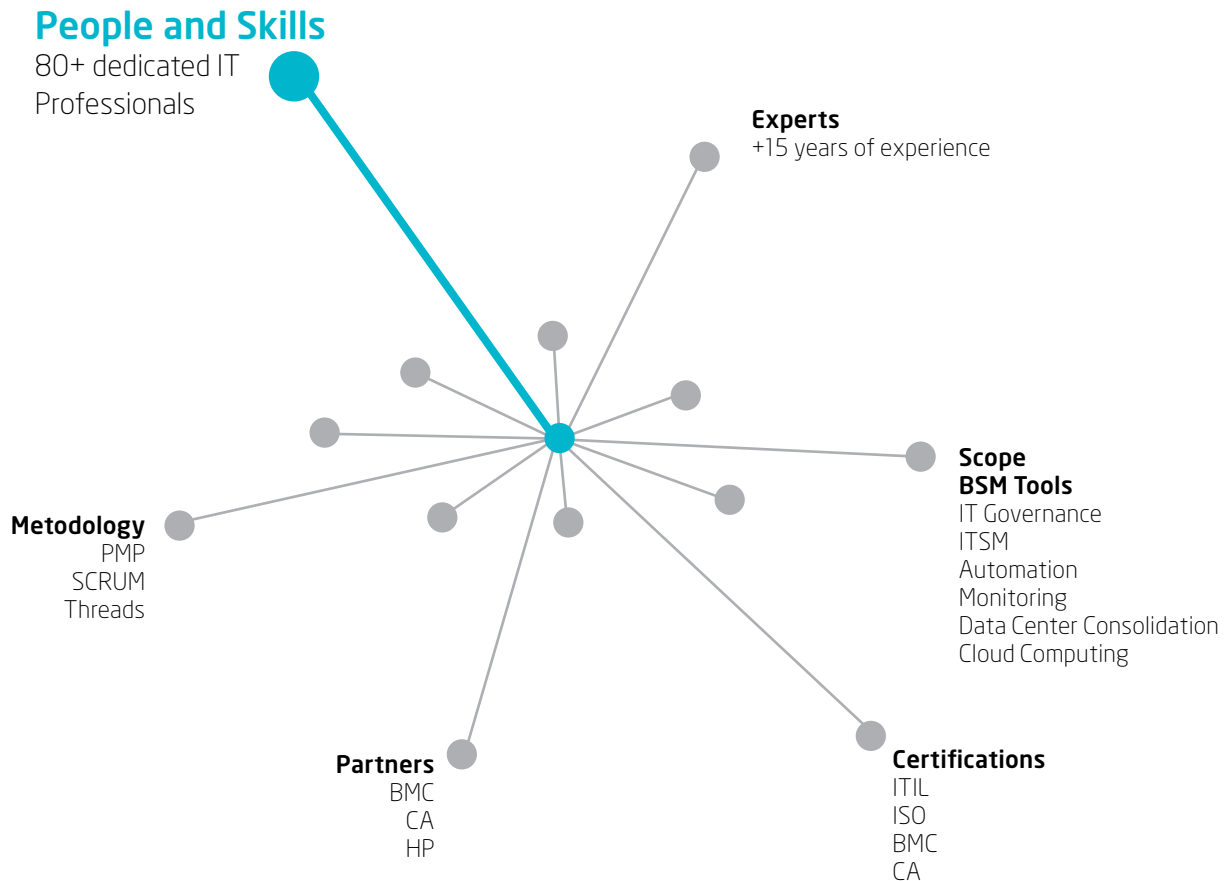

End to end vision on how to integrate IT with business strategy.

### SOA Architecture

Facilitates integration between products while minimizing the cost and difficulty to upgrade components.

### Threads based Methodology

Our thread based methodology combines predictive frameworks (PMI) with agile methodologies, facilitating change management, reducing associated risks, maintaining control over costs, quality and management on a large project.

## Solutions

### • IT Service Management Procesos

#### **ITIL Process Implementation,**

Implementation of IT Management Tools that automates and facilitate IT delivery, supporting all ITIL V3 processes such as Incident, Problem, Change and Release Management.
