

INDRA WILL DRIVE THE DIGITAL TRANSFORMATION OF GARCÍA CARRIÓN BY OPTIMIZING ITS BUSINESS PROCESSES

- **It has enhanced its systems to the latest SAP S/4Hana technology and put it at the heart of the business, to increase the company's competitiveness in an increasingly demanding market and improve its service and profitability**
- **Indra has established itself as the benchmark technology provider for companies to achieve the highest levels of quality in their internal processes and operations, through excellence in their operations and the most profitable and innovative solutions**

Madrid, July 09, 2018. Indra is collaborating with the digital transformation of the business processes of the García Carrión business group, by enhancing them and adapting them to SAP S/4Hana technology. Consequently, it is going to simplify operational functions and streamline access to and exploitation of information related to the company's management and thus make it more competitive and adapted to the new needs imposed by the market.

With a mixed implementation approach, the processes in all of the group's operational areas will be re-analyzed to enable it to increase its operability and efficiency. For that purpose, García Carrión, with Indra's help, will combine technological re-implementation with converting processes, in cases in which they have become obsolete and not very functional. This will preserve the logs and certain optimal customizations carried out, while helping the company to simplify and optimize those processes that have degraded during the life of its systems.

The business's conversion to SAP S/4Hana technology will radically improve how processes are executed in García Carrión and will allow standardization in commercial and treasury-related areas, reducing their complexity and increasing their efficiency and profitability. In addition, it will improve industrial and financial planning while streamlining processes and making real-time information constantly available. This development will help the business group to adapt to the new times, growing in competitiveness and improving its service, both to the client and in terms of productivity.

Knowledge of the business in the strive for excellence

Indra is at the cutting edge of the Consumer market, with a wide range of differential value that covers the entire life cycle of the technology in the company: from consultancy to the development and implementation of solutions, and including the outsourcing of systems and process operations. Its developments, which are designed to constantly improve resource management and productivity, not only improve its clients' competitiveness, but also allow them to access new opportunities in the market. Indra's commitment to end-to-end traceability of the product and real-time control of operations represents a qualitative, groundbreaking step forward in the design and execution of business processes, helping leading companies and institutions take innovation to the next level.

Thanks to its references within this sector, Indra has established itself as the benchmark technology provider for companies and large groups to achieve the highest levels of quality in their internal processes and operations, through the most innovative technological solutions. Indra's experience, together with its great knowledge of the business and the best tools, gives it a unique agility in implementing the most adequate systems so that each business can gain in excellence and productivity.

Indra, SAP's Global Partner Services

Since 2011 Indra has been part of a small group of companies that have been awarded the top SAP category in services, known as "SAP Global Partner", and help their clients design, implement and integrate solutions, while optimizing business processes and providing consultancy services of high strategic value. Global

Partner Services are the highest collaboration level offered by SAP, and form part of a selected group of companies whose business vision is greatly focused on this technology.

Currently companies face the continuous challenge of managing increasingly complex project risks. As a certified member of the SAP quality program, Indra has the capacity to help its clients to prevent threats, maintain profits and improve their services through a clear and consistent methodology.

With more than 2,600 SAP consultants and projects in 35 countries, the technology and consulting firm has also experienced strong growth in Latin America, where it has become one of SAP's global reference partners, as well as being number 1 in the matrix of service partners in horizontal solutions in Spain.
