

INDRA REINFORCES QUALITY MANAGEMENT IN ITS AEROSPACE AND DEFENCE SOLUTIONS

- **Indra regularly submits its processes to evaluation in order to obtain certifications from the aerospace sector which accredit the maximum quality and reliability of its systems**
- **It also renews the three specific PECAL certifications for the Defence sector that the Ministry of Defence and NATO countries require from their suppliers**
- **Constantly reviewing and improving its processes allows Indra to increase its efficiency and gain competitiveness in order to provide better customer service**

Madrid, January 22, 2021 - Indra, one of the main global technology and consultancy companies, has recently passed the external assessment process which its industrial processes are subjected to in order to ensure maximum quality and reliability in all the technological systems it develops for the aerospace and defence sectors.

The criticality level of the systems used in these sectors is maximum. They must be both reliable and capable of operating in the most demanding environments and under extreme conditions.

In order to guarantee the highest level of quality to its customers, the company has just obtained the EN 9120 certification and renewed the EN 9100/9110 benchmark standards in the aerospace sector for quality management systems.

It has also renewed the three PECAL certifications (2110/2210/2310) required by NATO for Quality Assurance in the design, development, and software production for suppliers in the aviation, space, and defence sectors.

These certifications are associated to more than ten of Indra's work centers and their compliance is also required by the Spanish Ministry of Defence and by the main international companies which Indra works with.

This achievement forms part of Indra's commitment to customer satisfaction and ensures compliance with all applicable legal and regulatory requirements. Moreover, it enables the company to maintain a system that guarantees the most demanding level of quality in each of the projects and operations it develops, as well as being able to adapt to and comply with the expectations.

About Indra

Indra (www.indracompany.com) is one of the leading global technology and consulting companies and the technological partner for core business operations of its customers world-wide. It is a world-leader in providing proprietary solutions in specific segments in Transport and Defence markets. Indra is an international leader in the Defence Industry for its development of critical national defence projects for the countries for which it works, for its participation in major European programs in the NATO framework and its export capacity, as well as the Spanish national coordinator in the European FCAS Defence program. Moreover, it is a leading firm in Digital Transformation Consultancy and Information Technologies in Spain and Latin America through its affiliate Minsait. At the end of financial year 2019, Indra achieved revenue of 3.204 billion euros, more than 49,000 employees, a local presence in 46 countries, and commercial operations in more than 140 countries.
