

SIA SOLIDIFIES ITS COMMERCIAL CAPABILITIES WITH THE ACQUISITION OF THE GERMAN CYBERSECURITY COMPANY MSS

- The operation gives the company a competitive edge and provides enhanced cross-selling potential and new sales to the German and global customers of MSS
- It expands its network of Cybersecurity Operations Centers (SOCs) by adding the MSS center in Mainz to its existing centers in Madrid, Mexico City and Bogota, strengthening the protection it provides its customers' key operations worldwide

Madrid, June 17th, 2021. - [SIA](#), an Indra company, has acquired the German cybersecurity company MSS, highly specialized in detecting and responding to cyberattacks.

The operation enables SIA to strengthen its options for the marketing of its portfolio of specialized services and solutions throughout Europe, covering three key areas: Digital Risk, Cybersecurity Services & Solutions and Digital Identity & Signature. At the same time, it provides for improved cross-selling potential and new sales opportunities for MSS customers (German and global entities), thanks to a product offering with strong added value.

In addition, with this acquisition, SIA increases its capacity to support the German customers of the Indra Group and expands its network of Security Operations Centers (SOC) with the one that MSS has in the German city of Mainz, enabling SIA to provide better protection to its customers' key operations worldwide. This center joins SIA's network of SOC's in Madrid, Mexico City and Bogota, where SIA supervises the security of different governments and some of the largest companies in Europe.

MSS will continue strengthening the values that has made it a stand-out company (flexibility, customer orientation and specialization), now working alongside SIA.

SIA has the broadest portfolio of services and solutions in the market to solve the challenges that digital transformation poses to organizations. The managed cybersecurity services that SIA provides from its network of SOC's make up a key part of the comprehensive strategies it defines in collaboration with its customers to ensure their business sustainability and success.

About Indra

Indra (www.indracompany.com) is one of the leading global technology and consulting companies and the technological partner for the key operations of its customers' businesses around the world. It is a world-leader in providing proprietary solutions in specific segments in Transport and Defense markets, and a leading firm in Digital Transformation Consultancy and Information Technologies in Spain and Latin America through its affiliate Minsait. Its business model is based on a comprehensive range of Bandwidth proprietary products, with a high-value focus and with a high innovation component. In the 2020 financial year, Indra achieved turnover of €3.043 billion, around 48,000 employees, a local presence in 46 countries and business operations in over 140 countries.

About SIA

SIA is an Indra company that specializes in cybersecurity. It is a leader in Spain and Portugal, in the turnover of its services and in human talent, with more than 1,200 specialists. Its value proposition has two core elements: the protection of the technological footprint, which includes consulting, protection, detection and response services, and the set-up of new business models, with the digital identity and signature as brands. As a member of the Indra Group, one of the leading global technology and consultancy companies with business operations in 140 countries, it provides SIA with a profound knowledge of the sector as well as a solid worldwide presence.
