**Press
Release**

INDRA WILL PRESENT ITS MOST ADVANCED SECURITY SOLUTIONS AT HOMSEC

- **The company will exhibit its unmanned aerial aircraft, emergency management systems and NRBQe systems**
- **Likewise, the company will participate in professional forums to analyse the latest advances in cybersecurity, C4ISR, simulation, logistic systems and smartcities**

Indra will present its state-of-the-art solutions at the IV Edition of the Homsec, International Trade Show dedicated to Technologies for Defense and Security, which will be held in Madrid from the 12th to the 15th of March.

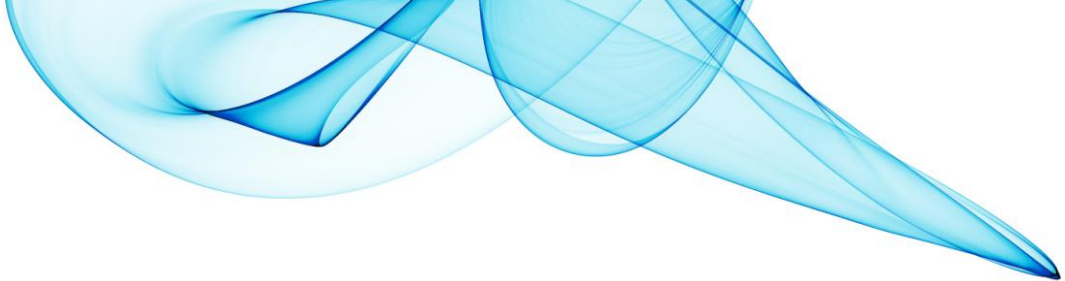

The company will exhibit the Mantis unmanned aerial aircraft in its stand, a system with a surveillance capacity of up to 30 km, as well as its Pelicano unmanned aerial helicopter, designed for surveillance tasks, with a range of up to 150 km. This helicopter can operate from ships.

It will also exhibit its emergency management and coastal protection systems. Indra's systems currently protect over 5,000 km of frontiers in different European and Asian countries.

Likewise, it will provide information to the event's participants about the P2006T MRI, the first light aircraft to integrate a radar, electro-optical system, AIS ship identification system and communications link. This aircraft offers the highest sea surveillance capacity at the most competitive price.

On the other hand, Indra will present important new developments in the NRBQe security area at the International Trade Show. The company will present its new NRBQe reconnaissance vehicle, which is capable of travelling to a risk area to detect and analyse potentially contaminating agents. It will also present the latest advances in forensic detection and analysis systems for improvised explosives.

The company will also present its police training equipment, radioactivity detection systems for airports and industrial facilities, forest fire detection system and the new iSafety emergency management platform for smart cities.

An abstract graphic consisting of several overlapping, semi-transparent blue shapes that resemble liquid or smoke, flowing from the top left towards the bottom right.

Indra's technology will also be exhibited at the General Industry Department's stand of the European Commission during the Homsec Trade Show. This organisation will exhibit seven of the most important R+D initiatives it has sponsored in the security area. These will include the OPTIX remote explosive detection project and the Perseus European coastal surveillance project, both of which are led by the multinational company.

Indra will also participate in different forums during the 4 days of the Homsec Trade Show. The company will present its vision on the new technological developments, such as Cybersecurity, C4ISR, Simulation, Logistic Systems and Smartcities.

Indra

Indra is the leading Spanish multinational consulting and technology firm and one of the main players in Europe and Latin America. Innovation is the cornerstone of its business and sustainability, having allocated €550M to R+D+i in the last three years, making it one of the leading companies in Europe in its sector in terms of investment. With sales approaching €3,000M, 55% of its income is from the international market. The company employs 42,000 professionals and has customers in 118 countries.
